Museums Need To Act To Ensure The Exhibition Tax Relief Benefits Everyone

The government is proposing a major new way of investing in museums and galleries, through an exhibition tax relief. But the current proposals will exclude hundreds of museums across the UK by limiting the tax relief to temporary and touring exhibitions.

We are urging AIM members to respond to the government's consultation to ensure that the tax relief is fair and that every member of the public, whether their local museum has temporary exhibitions or not, has the potential to benefit.
